

DOCTORAL RESIDENCY PROGRAM IN CLINICAL PSYCHOLOGY

Accredited by:
Canadian Psychological Association
Accreditation Canada

Doctoral Residency Program in Clinical Psychology

INTRODUCTION

Who Are We?

ROCK is a non-profit child and youth mental health agency that has served Halton for more than 40 years. We provide an inter-professional approach to the assessment and treatment of children, youth and families. ROCK is also the Lead Agency for children's mental health services in the Halton Region. Our mission is to work together to promote and achieve optimal mental health in kids and families. That is, our goal is to help families live healthier lives through early assessment and diagnosis, effective and innovative treatment, and prevention and early intervention for those having, or at risk of developing, mental health problems or mental illness. In addition, ROCK strives to promote positive child development through programs and services that strengthen the ability of families and the community to raise and nurture children. ROCK provides a multidisciplinary approach to the assessment and treatment of individuals ages 0 through 17 and their families who are experiencing difficulty. ROCK is also involved in multiple partnership programs that provide services for Transitional Aged Youth up to the age of 25 years. We are committed to providing services that are inclusive, client and family-centred, professional, high quality, and accessible.

ROCK is accredited with Exemplary Standing by Accreditation Canada. Our catchment area includes all of Halton Region; thus, ROCK provides services targeting a broad spectrum of presenting difficulties spanning the full range of child development. ROCK is the largest children's mental health service provider in Halton Region, serving over 8,000 clients and families yearly and offering over 30 different programs and services. In general, clients and their families who come or are referred to ROCK are experiencing developmental, emotional, relational, behavioural and/or social difficulties. These difficulties put them at risk for, or result in, serious mental health problems.

Where Are We?

Sites and Services

ROCK has a total of 10 sites in which services are delivered across Halton Region. There are 3 full clinical office sites, one in Burlington, one in Oakville, and one in Milton. In 2017 ROCK added 2 walk-in clinic sites located in Georgetown and Acton. Aberdeen House, is a residential treatment facility for youth aged 12 to 15 located in Oakville. ROCK also operates 4 prevention and early intervention sites that house Ontario Early Years Centre programs. The access point for services is through attending the Walk-In Counselling Clinic (currently offered virtually) or by calling ROCK's Access Line.

Located in the Greater Toronto Area, between Peel and Hamilton-Wentworth Regions, Halton Region is one of Canada's most dynamic areas, covering over 232,000 acres of land, including a 25-km frontage on Lake Ontario. The local communities of Burlington, Halton Hills, Milton, and Oakville comprise Halton Region.

Land Acknowledgement

Halton Region stands on the traditional territory of the Anishinabe, Haudenosaunee and the Huron-Wendat; now home to many First Nations, Inuit and Métis peoples. We acknowledge the current treaty holders, the Mississaugas of the Credit First Nation. We are grateful for the use of this land and we thank all the generations of people who have taken care of the land and for those who continue today.

Halton residents have inherited a rich and diverse natural legacy that includes a wide range of plants and wildlife, unusual features and areas of spectacular beauty. The Niagara Escarpment is striking as it forms a diagonal line across the entire Region. The Lake Ontario waterfront provides opportunities for recreation and boating in an urban setting.

For further information about Halton Region and the cities of Burlington, Halton Hills, Milton and Oakville, please visit the following websites:

PSYCHOLOGY AT ROCK

In line with the agency's philosophy and mission, the psychology staff at ROCK are committed to client- and family-centred care. As scientist-practitioners on multidisciplinary teams, our psychology staff provide assessment, treatment, and consultation services to clients from infancy to 17 years. The ROCK psychology staff is composed of clinical psychologists, research psychologists, psychometrists, and residents (see page 16 for a description of psychology staff members).

The Clinical Psychology Residency program is accredited by the Canadian Psychological Association (CPA), currently from the 2017/2018 academic year through the 2022/2023 academic year. The next site visit will take place in the 2022-2023 academic year. Further information on Accreditation can be obtained from the CPA Accreditation Office at 141 Laurier Avenue West, Suite 702, Ottawa, Ontario K1P 5J3. **ROCK is a member of APPIC and participates in the APPIC Match.**

PROGRAM PHILOSOPHY

The Doctoral Residency Program in Clinical Psychology provides clinical training in psychology that promotes scholarly and scientific client-centred practice. Our program's aim is to prepare residents for post-doctoral supervised practice in psychology and for their diverse roles as professional psychologists by promoting critical thinking and the ability to apply research and scholarly literature to ethical practice. Although clinical training is emphasized, the scientist-practitioner model provides a philosophical framework for our clinical practice such that good practice has both an empirical basis and clinical relevance. The ROCK Doctoral Residency Program in Clinical Psychology promotes professionalism, interpersonal, and communication skills through its emphasis on cooperation and collaboration with multiple disciplines working in the field of child and family mental health.

****Response to Covid19 Pandemic**

ROCK was able to quickly transition to providing virtual services and supports in response to the Covid19 Pandemic. At this time, Psychology Services are being provided using a hybrid model, by utilizing a combination of both virtual and in-person sessions (with appropriate PPE and safety protocols in place). Staff are able to move fluidly between working from home and in-office, depending on the needs and wishes of the client and the current environment.

RESIDENCY GOALS AND OBJECTIVES

The primary goal of the doctoral residency program at ROCK is to prepare Residents to enter a career as professional psychologists working with children 0 to 18 years of age and their families. Residents will develop skills and knowledge in the areas of diagnosis, assessment, consultation, treatment, and professional and ethical issues. Residents are expected to think critically about the services that they offer to clients and families and to make clinical decisions based on data collected in the therapeutic/assessment context and informed by empirical research.

Residency goals are aligned with the competency domains established by the Association of Directors of Psychology Training Clinics Practicum Competencies Workgroup via discussion with the Council of Chairs of Training Councils Practicum Competencies Workgroup (2006). Two additional goals are setting-specific.

Goal 1: Psychological Assessment Skills

To ensure that Residents are competent in conducting psychological assessment of children and adolescents, including diagnostic interviewing and psychodiagnostic evaluation.

Objectives

1. The Resident will demonstrate competence in conducting diagnostic interviews with children and families.
2. The Resident will be able to select, administer, score, and interpret a range of psychological assessment measures for children and adolescents, including psychometric instruments for the purpose of assessing cognitive ability, memory, visual motor skills, academic or pre-academic functioning, and behavioural and socioemotional functioning.
3. The Resident will have the capacity to communicate clearly, verbally and in written form, a formulation of the problems and practical and functional recommendations about intervention to the child, family, and professional colleagues.

Goal 2: Intervention Skills

To ensure that Residents are competent in planning and providing a range of psychological treatments through individual, group, and family-based interventions.

Objectives

1. The Resident will understand the basis of treatment formulation, including empirically supported intervention, development of treatment goals, and psychotherapeutic strategies.
2. The Resident will demonstrate competency in a range of therapeutic techniques with children, adolescents, and their families.
3. The Resident will demonstrate an understanding of the process issues related to intervention.

Goal 3: Consultation Skills/ Interprofessional Collaborations

To ensure that Residents develop the personal skills and attitudes necessary for practice as a psychologist within a multidisciplinary context, including oral and written communication skills, consultation skills, and the ability to work with other professionals.

Objectives

1. The Resident will interact competently within a multidisciplinary team as indicated by appreciation of the significant contributions of team members from various disciplines (e.g., social workers, child and youth workers, occupational therapists), and the ability to work collaboratively with other team members, keeping the needs of the client and family foremost.
2. The Resident will gain experience in providing and receiving consultation to/from other professionals within the agency and the community regarding the care and treatment of children, adolescents, and their families.

Goal 4: Relationship/Interpersonal Skills

To ensure that Residents conduct their practice with professional maturity, and to engage in constructive relationships with clients, families, and other professionals.

Objectives

1. The Resident will demonstrate the ability to organize his or her activities effectively and can dependably carry out assignments.
2. The Resident will establish appropriate professional and collegial relationships as indicated by seeking consultation appropriately, providing consultation effectively to peers and staff, and respecting privacy and confidentiality.
3. The Resident will manage personal stress and his/her own emotional responses in a way that does not result in inferior professional services to the client or interfere with job responsibilities.

Goal 5: Diversity - Individual and Cultural Differences

To ensure that Residents increase their appreciation and understanding of multicultural issues and individual differences when working with children, adolescents and their families.

Objectives

1. The Resident will demonstrate an awareness of and respond appropriately to multicultural, ethnic, and other individual differences in the provision of service (e.g., choice of tests, use of interpreters, sensitivity to appropriate pronoun use, sensitivity to family belief systems).
2. The Resident will participate in seminars focused on learning about effective practices when working with individuals from diverse backgrounds and situations.

Goal 6: Ethics

To ensure that Residents develop the awareness, knowledge, and application of ethical and professional principles of psychology in clinical activities so that the Resident will aspire to the

highest ethical and professional standards in future professional roles.

Objectives

1. The Resident will demonstrate a comprehensive knowledge and a keen sensitivity to professional ethics in terms of ethical standards, codes of conduct, different legislation relating to psychology, and obligations under the law.
2. The Resident will demonstrate knowledge of one's own limits of competence, one's strengths and limitations as a psychologist given their level of professional training and experience, through goal setting, evaluation, and supervision process.
3. The Resident will have the opportunity to extend their understanding of ethical issues as it applies to clinical decision-making.

Goal 7: Skills in Application of Research

To ensure that Residents understand the interplay of science and practice.

Objectives

1. The Resident will be able to access and synthesize the research literature relevant to clinical problems, to determine "best practices", and to use this information to guide assessment, treatment, and program development.
2. The Resident will participate in the process of planning, implementing, and reporting on program evaluation.

Goal 8: Professional Development

To ensure that Residents foster a commitment to self-directed learning as a lifelong process.

Objectives

1. The Resident will demonstrate a desire to learn through self-reflection and involvement in agency committees.
2. The Resident will participate in active learning by conducting and attending presentations or seminars, keeping abreast of current literature, and/or presenting a synthesis of research findings at Psychology team meetings.

Goal 9: Supervisory Skills

To introduce Residents to the critical role of supervisor within the practice of professional psychology.

Objectives

1. The Resident will gain knowledge of literature on supervision (e.g., models, theories, & research) through directed readings.
2. The Resident will gain experience providing supervision, under supervision, with junior practicum students within the agency.

Goal 10: Metaknowledge/Metacompetencies – Skilled Learning

To ensure that Residents develop skills regarding reflective understanding and knowledge of their own knowledge and competencies. Meta-skill development depends on self-awareness, self-reflection, and self-assessment.

Objectives

1. The Resident will gain awareness of the range and limits of what he or she knows with respect to the practice and profession of psychology, including an awareness of personal areas of intellectual/clinical strength and weakness.
2. The Resident will gain the ability to judge the availability, use, and learnability of personal areas of competence.

Goal 11: Use of Supervision

To ensure that Residents develop skills regarding the effective use of supervision.

Objectives

1. The Resident uses supervision in an open and constructive manner, knowing when to seek additional supervision. This is meant to teach an approach to professional practice that will be ongoing throughout the resident's professional career.
2. The Resident demonstrates the ability to discuss in supervision those behaviours, personal characteristics, and concerns that might aid or interfere with one's effectiveness as a psychologist.

Goal 12: Breadth of Training Experience

To ensure that Residents gain experience with children and families over a wide age range and a wide range of presenting problems, with a balance of both assessment and intervention.

Objectives

1. Residents will choose two major rotations and one minor rotation that will provide them with experience in both assessment and treatment.
2. The Resident conducts assessments and provides treatment to children 0 to 18 years of age.
3. The Resident gains experience in providing treatment to children presenting with a wide range of problems including (but not limited to) behavioural issues, internalizing disorders, autism spectrum disorders, and complex disorders of learning and development, and their families.

RESIDENCY STRUCTURE

The residency year has been divided into two five-month clinical rotations plus an orientation period, a transition period between rotations, and a final wrap-up period.

Orientation	Session I	Inter-session	Session II	Wrap-up
2 weeks	Sept to Feb	2 weeks	March to Aug	2 weeks

The structure of the residency fosters both depth and breadth of training. The Residency structure allows for long-term therapy involvement with supervisory continuity, assessment experiences with the full age-range spectrum (0-18 years), and involvement in a wide variety of clinical programs.

Orientation

The purpose of the 2-week Orientation period is to familiarize residents with ROCK and the services that are provided by the agency. The Orientation period is intended to help Residents understand their training in the context of a multidisciplinary setting and to begin developing their training plan for the residency year. Orientation modules provide Residents with observational, didactic, and interactive experiences in services where psychological assessment, treatment, and consultation take place. During the Orientation period, each Resident is provided with the Clinical Psychology Resident Handbook, which includes descriptive information about ROCK, copies of relevant agency policies and procedures, and description of programs.

Rotation Selection

In consultation with the Residency Director and Primary Supervisor, Residents are expected to select two major and one minor rotation. In order to ensure that the Residency experience balances breadth and depth of training, some basic guidelines for rotational selection have been established. Residents must complete at least one rotation in assessment and at least one rotation in treatment. Rotations are described in detail in a later section. Please note that rotations are subject to change pending staff availability.

Residents will select a Major Rotation within each five-month session. A Major Rotation will represent a commitment of approximately three days per week. In addition, residents will select a Minor Rotation, which will involve one day per week, for the full duration of the residency. A total of 4 1/2 hours per week has been set aside for didactic seminars, group supervision, and multidisciplinary team meetings, and 2 1/2 hours per week has been set aside for Residents to participate in personal research and program evaluation.

Residents will complete both a Major Rotation in Assessment and a Major Rotation in Treatment. The makeup of these rotations will depend on the interests and training needs of each resident. That is, there is flexibility within each rotation with respect to age range of clients, presenting issues, therapy modalities and approaches. For example, one individual may choose to complete a Major Rotation in Assessment that is more heavily focused on assessment of

young children, while another may choose to focus their assessment rotation on school-age children and adolescents. Similarly, one resident may want to focus more on assessment of specialty areas such as ASD and/FASD, while another may wish to focus more on mental health assessment. All residents are encouraged to build some individual, family, and group therapy into their Major Therapy Rotation, as well as to gain some experience in the walk-in clinic. Residents are also encouraged to gain some experience with our Early Years Population (0-8), however, this can be achieved either through the selection of a minor with this population or by building it into a Major Rotation.

The function of the Minor Rotation is to round out the resident's experience or provide training in a more specialized area of interest. Examples of Minor Rotations include Treatment with Young Children 0 to 8 years, Walk-In Counselling Clinic, Autism Spectrum Disorder Assessment, Assessment of Young Children, Fetal Alcohol Spectrum Disorder Assessment and Group Therapy. Experience in all of the Minor Rotation areas can be built into a Major Rotation, however, choosing it as a Minor allows for more focused training in that area across the year.

Inter-Session

A two-week Inter-Session period follows the end of the Rotation Period. The purpose of this session is to provide Residents with the opportunity to complete work from the first rotation, complete evaluations, meet new supervisors, and become oriented to the second Rotation Period.

Wrap-Up

The final two weeks of the Residency are dedicated to completion activities such as case closures and transfers, final documentation, evaluations etc. Certificates of Successful Completion of the Clinical Psychology Residency will also be granted at this time.

OVERVIEW OF CLINICAL ROTATIONS

As a community mental health agency, clinicians at ROCK see a broad range of presenting issues, including internalizing, externalizing, and comorbid conditions. Residents will have the opportunity to gain experience with both assessment and treatment, across a broad range of presenting issues and modalities (i.e., family, group, individual), and utilizing various theoretical orientations. All services at ROCK are client-centred and generally seek to involve parents/caregivers, where possible.

MAJOR ROTATIONS

Assessment

Assessments occur with children ages 2 through 18 who have been referred due to concerns about development (e.g., receptive/expressive language delays, cognitive delays, autism spectrum disorder), behaviour and social-emotional functioning/ mental health. Clients accepted for assessment are generally presenting with complex profiles, often involving a history of trauma and or attachment disruption, and must have a mental health query. Assessments involve individual, parent and collateral interviews, natural environment observation (e.g., school, daycare, home), administration, scoring, and interpretation of a variety of psychological measures (including standardized tests as well as projective measures), and more specialized diagnostic tools (e.g., Autism Diagnostic Observation Schedule, Second Edition). Comprehensive psychological reports, including treatment recommendations, are provided and shared with parents and other collaterals as appropriate.

Treatment

Within the Treatment Rotation, opportunities exist for therapeutic intervention across multiple modalities, including individual, family, and group, and across various models (e.g., CBT, DBT, narrative, brief, attachment-focused, solution-focused, and strength-focused therapies). Services are offered within the context of a multidisciplinary team of psychologists, social workers, occupational therapists, crisis counsellors, and child and youth workers. Thus, residents will gain exposure to the roles and methods of multiple disciplines and develop constructive working relationships across disciplines.

MINOR ROTATIONS

Early Years Treatment

Within the Early Years Treatment Rotation a number of different possibilities exist for therapeutic intervention across multiple modalities, including parent-child dyads, family, and group, and across various models (e.g., cognitive-behavioural, attachment-based psychotherapy, Circle of Security (COS)). For example, Parent-Child/Parent-Infant therapy aims to develop and enhance the parent-child relationship through videotaped, play-based interaction and feedback. Families accessing this service generally present with attachment disruptions (e.g., post-partum depression; periods of caregiver absence; parental mental/physical illness; adoption, etc.) reflected in problems with sleeping, eating, separation, jealousy or anger beyond the child's

developmental stage. Family Therapy aims to strengthen interactions and communication within the family as well as promoting an understanding of children's behaviour as communication. There are also a number of parenting groups for families coping with children exhibiting difficult behavior.

Walk-In Counselling Clinic

ROCK's Walk-In Counselling Clinic allows families to access single session therapeutic intervention with no appointment necessary. Clients are seen on a first-come, first-served basis and meet with a clinician for a one-hour period. Walk-in counselling sessions focus on very brief intervention (one session) for the purpose of providing assistance immediately and/or obtaining enough information to effectively make recommendations for further services and supports. Models for walk-in counselling include narrative, emotion-focused therapy, brief, solution-focused, and strength-focused therapies. Like all services at ROCK, walk-in has been provided virtually during the Covid19 Pandemic. Moving forward walk-in services will be offered both in-person and virtually based on client preference and therapeutic need.

Autism Spectrum Disorder Assessment

Although most straight forward autism queries are referred out for assessment through developmental pediatricians or the Ontario Autism Program, Psychology Services at ROCK see many clients where the diagnostic picture is more complex, and there is a need to tease apart potential ASD symptoms from mental health concerns, trauma and/or attachment related challenges. Methods that are used to assess for ASD may include detailed developmental history, Autism Diagnostic Inventory – Revised, and Autism Diagnostic Observation Schedule, Second Edition. The resident would participate with their supervisor, observing and learning to administer and score the ADI-R, SRS2, ASRS, CARS2 and/or the ADOS-2.

Fetal Alcohol Spectrum Disorder Assessment

The FASD Assessment and Diagnostic Team is a multi-disciplinary team that provides assessment to individuals age 2 to 24 that have known prenatal alcohol exposure. This multi-disciplinary team is a community collaboration of professionals including Medical Physicians, Psychology, Occupational Therapy, Speech and Language Pathologists, Social Work, Child and Youth Workers and Transitional Age Youth Workers. Residents completing a minor rotation in this area will be provided with training in the Canadian Guidelines for FASD Diagnosis and will complete comprehensive psychological assessments to contribute to the multi-disciplinary teams' clinical discussion, diagnostic formulation and provision of recommendations.

Group Therapy

Many therapy groups run at ROCK, including the Children's Anxiety group, the Trauma Group, Emotion Focused Family Therapy Group (EFFT), Dialectical Behavior Therapy (DBT) Skills Group, Circle of Security (COS) and the ROCK OUT 2SLGBTQ+ Youth Group. Residents would observe or co-facilitate existing groups, and would have the opportunity to design and run their own therapy group for the ROCK population.

EDUCATIONAL OPPORTUNITIES/ DIDACTIC SEMINARS

Multidisciplinary Team Meetings

Residents will attend Multidisciplinary Team meetings for the purpose of case discussions/reviews. Residents present their own cases as well as provide input to team members from a psychological perspective. Attendance at additional team meetings may also be required depending on rotation choices.

Psychology Team Consultation Meetings

Residents attend weekly Psychology Team meetings for the purpose of case consultation. Residents both present their own cases as well as contribute to the clinical discussion related to cases presented by other members of the Psychology Team.

Psychology Team Administrative Meetings

Residents attend monthly Psychology Team meetings to stay up to date on administrative information/communications, review team goals, and identify any new material, structural or educational supports that may be needed to support their role.

Psychology Lunch and Learns

Psychology Staff gather once every other month to participate in learning opportunities targeted specifically to the Psychology Team. This can include presentations by psychology staff, students, and residents as well as external presenters. Residents are expected to present to the Psychology Team at least once during their residency year.

Residency Advisor Meeting and Seminars

Residents attend monthly meetings with the Residency Advisor. During the monthly meeting/seminar topics such as legislation relevant to psychology, supervision, multicultural issues, and diversity are discussed. Relevant readings are also provided.

Clinical Grand Rounds

Residents attend Clinical Grand Rounds on monthly basis. This 90-minute seminar focuses on professional, clinical and ethical issues related to diagnosis, assessment and treatment of children, adolescents and families as well as on relevant applied research. Discussions/presentations are led by psychology staff, Residents/students, other internal staff (e.g., social workers, crisis workers, occupational therapists etc.), and external speakers (e.g., community professionals, university researchers).

Residents are also strongly encouraged to attend the monthly education sessions provided by the Toronto Area Internship Consortium and CCPPP.

Committees

Residents collaborate with our Research Director to gain practical experience with program development and evaluation. As well, both Residents participate as members of the Residency

Training Committee, which meets on a monthly basis.

Community of Practice (CoP) Opportunities

There are a number of CoP opportunities for Residents to choose from. Residents are strongly encouraged to participate in the 2SLGBTQ+ Clinical CoP. Depending on their areas of interest they may also wish to consider joining other CoPs (e.g., DBT CoP, Trauma CoP, Early Years CoP).

SUPERVISION

Residents can expect a minimum of four hours of supervision per week by an experienced, doctoral-level, registered psychologist. At least three of the four hours must consist of direct observation of clinical service provision (e.g., in the room with a Resident or behind one-way mirror), review of audio or video recordings of the Resident's clinical service provision, and/or clinical case discussion of the Resident's cases. Three of the 4 hours are individual supervision format. The remaining hour, which may occur in either individual or group format may consist of: participation in supervision received by another Resident or trainee regarding that individual's clients, discussion of methods/techniques of psychological service delivery, discussion around particular problems/disorders, and/or discussion of professional or ethical issues pertaining to clinical practice.

Although styles of supervision may vary, Residents can expect to learn from modeling, observation, directed readings, feedback, ethical training, and professional guidance. Supervision is individually tailored to meet the developmental learning needs and training goals of each Resident. Residents receive supervision in both individual and group formats, in addition to attending multidisciplinary team meetings and case conferences. Additionally, the issues addressed during supervision time must be clinical, professional, or research in nature. A psychotherapeutic relationship between Resident and Supervisor cannot be substituted for supervision. Discussion of a Resident's personal issues only counts as supervision when the issues are addressed in terms of client welfare and/or Resident professional functioning.

All Residents are assigned a psychologist to act as their Primary Supervisor for the duration of the residency. The Primary Supervisor may help to coordinate meetings, document progress, liaise with the Resident's university, and assist with the setting and achieving of the Resident's goals. For each rotation, Residents are assigned Rotation Supervisors who supervise activities within the particular rotation. Rotation Supervisors may or may not be psychologists. In the event that a non-psychologist staff member provides the Resident with supervision, the primary supervisor attends supervision meetings and acts as a co-supervisor. In the event of a disagreement in clinical direction, the Supervising Psychologist, who is clinically responsible for clients receiving services by the resident, will determine the clinical direction. Residents are also assigned a Back-Up Supervisor who is responsible for providing supervision should their Primary Supervisor not be available (e.g., due to illness or vacation).

At the beginning of the residency year Residents submit a written individualized Training Plan for the whole year, as well as more specific goals for each rotation. Rotation goals are negotiated with the Rotation Supervisors.

Residents meet monthly with the Resident Advisor to discuss their experiences in the rotations. The meetings also help the Residency Director ensure that the training goals are being addressed. Ethics, legislation, and issues of professional practice in psychology will be formally discussed in the context of these meetings.

All primary supervisors, the residency director and the residency advisor meet monthly to ensure

that the residency program is running smoothly and to problem solve any challenges that arise. Residents join the second half of this meeting.

EVALUATION

Evaluation of Resident performance is an ongoing and interactive process between Supervisor and Resident where by Residents receive feedback throughout the year via both informal and formal means. Written evaluations are conducted at the midpoint and end of each session. Residents are also given the opportunity to complete written evaluations of their Primary and Rotation Supervisors at these same intervals.

Evaluation Meetings:

1. At mid-session, the Primary Supervisor completes a written evaluation of the Resident's progress to date based on feedback from Rotation Supervisors. This mid-session evaluation is reviewed in a face-to-face meeting with the Resident, Primary Supervisor, Residency Director, and Rotation Supervisors. Also, in preparation for the meeting, Residents complete an evaluation of their residency experience (e.g., rotations and supervision) thus far.
2. An end-of-session meeting is conducted in which the Resident, Primary Supervisor, Residency Director, and Rotation Supervisors discuss their final evaluations for the session. The Resident's and Primary Supervisor's evaluations are submitted directly to the Residency Director (or in the case that the Residency Director is providing supervision, to the Residency Advisor). Resident evaluations are not shared with Supervisors until the end of the residency year unless requested otherwise by the Resident.
3. The Residents, Supervisors (Primary and Rotation), Resident Advisor and Residency Director attend a Program Review meeting held at the end of the residency year. The purpose of the meeting is to review areas such as the accuracy and appropriateness of the brochure, application and selection procedures, orientation to the agency, rotational assignment, supervisory assignments and process, seminar program, evaluation, and personal/professional needs and logistical supports. This meeting provides an opportunity for residency staff and Residents to reflect on what worked well and not so well during the year, and provides the Residency Director the opportunity to initiate actions or changes as indicated.

PSYCHOLOGY STAFF

Dr. Terry Diamond (Lead Clinical Psychologist & Residency Director)

Ph.D., 2005, York University, Clinical Developmental Psychology

Activities include program planning and facilitation for residency program, provision of support to supervisors, psychological assessment and consultation.

Dr. Joy Andres LeMay (Psychologist & Resident Advisor)

Ph.D., 2000, York University, Clinical Developmental Psychology

Activities include supporting the Residency Director with program monitoring and providing specific training in areas such as legislation, ethics and professional practice.

Dr. Sarah Tuck (Neuropsychologist)

Ph.D., 2012, York University, Clinical Developmental Psychology

Clinical activities include psychological assessment and consultation, individual, family, and group therapy. Involved in Residency Program as a Primary or Rotation Supervisor.

Dr. Natalie Bailey (Clinical Psychologist)

Psy.D., 2014, Pace University, School & Clinical Psychology

Clinical activities include psychological assessment and consultation, individual, family and group therapy. Involved in Residency Program as a Primary or Rotation Supervisor.

Dr. Andrea Markovic (Clinical Psychologist)

Ph.D., 2016, State University of New York at Buffalo, Clinical Psychology

Clinical activities include psychological assessment and consultation, individual, family, and group therapy. Involved in Residency Program as a Primary or Rotation Supervisor.

Dr. Marina Dupasquier (Clinical Psychologist)

Ph.D., 2018, McGill University, School/Applied Child Psychology

Clinical activities include psychological assessment and consultation, individual, family, and group therapy. Involved in Residency Program as a Primary or Rotation Supervisor.

Dr. Ashley Brunsek (Clinical Psychologist -Supervised Practice)

Ph.D., 2021, OISE University of Toronto, School and Clinical Child Psychology

Clinical activities include psychological assessment and consultation, individual, family, and group therapy. Supports residents with day to day activities and questions.

Mr. Brandon Campbell (Psychometrist)

B.A., B.Ed (Remedial Education), 1999, University of the Witwatersrand

Clinical activities include: psychological assessment and consultation. Involved in supporting residents with day to day activities/questions.

Dr. Surbhi Bhanot-Malhotra (Psychologist, Program Evaluation/Researcher)

Ph.D., 2009, University of Windsor, Applied Social Psychology

As lead researcher, activities include helping Residents to think about potential opportunities for program evaluation in a given year, to create a plan, and to support the implementation, analysis and report write up as needed.

APPLICANTS - Residency Specifications

Training Placements

Doctoral Clinical Psychology Residency Placements are offered to students enrolled in a CPA and/or APA accredited doctoral clinical psychology program. The program is able to accommodate 2 full-time Residents. Priority will be given to Canadian Citizens and applicants who are eligible to work in Canada in accordance with the Immigration Act. Residencies are typically completed on a full-time basis for a one-year period beginning in September and ending the following August. Applications for 2 consecutive half-time placements over a 2-year period may also be considered.

Residents are assigned to a clinical team at one of the offices for the residency year. Although every effort is made to minimize Resident travel among the ROCK sites, there is some travel expected among the various offices. As such, access to a personal vehicle is necessary for this residency placement.

Applicants must have attained at least 600 practicum hours (which must include experience with psychological assessment of children and report writing) and have had their dissertation proposal completed and approved at the time of application. Applicants will be expected to have completed their graduate level course work in psychology at the time of residency. Previous graduate course work in child development, psychopathology, child assessment, and

child treatment are also required. In selecting our Residents, we consider a number of factors such as academic background, relevant clinical experience, and progress on their dissertation. Of particular importance in the selection process is the fit between an applicant's interests and goals and our Resident Training Program's model of training.

Salary and Benefits

The salary for full-time Residents is based on an annual salary of \$34,500. All salaries are subject to available funds. All Residents are entitled to 2 weeks of paid vacation. All statutory holidays (11) and up to 5 sick days are paid. Residents will also receive 2 paid training days. All mandatory benefits are covered (e.g., Canada Pension Plan, EI, WSIB, EHT). Health and Dental coverage is not provided. All Residents must hold Professional Liability Insurance during the full course of their residency training. Proof of current Liability Insurance will need to be demonstrated prior to beginning the residency. Note: Some university programs provide coverage for their students.

DIVERSITY AND NON-DISCRIMINATION POLICY

At ROCK, an equitable, diverse, and inclusive, workplace community is one where all clients, families, employees, agents of ROCK and partners, no matter of their race, age, gender, sexual orientation, ethnicity, culture, heritage, traditions, family of origin, religion, differing abilities, level of education, political view, skill set, experience and competency, feel valued, heard and respected.

We are committed to a nondiscriminatory approach and provide equal opportunity for employment and advancement in all of our departments and programs.

We are committed to modeling equity, diversity and inclusion in our community and in the mental health sector and to continuously improve an environment that is diverse, inclusive and equitable.

To provide informed, authentic leadership for cultural diversity and inclusion, ROCK strives to:

- Lead with respect and dignity to see equity, diversity and inclusion as connected to our mission and integral to the well-being of our employees and agents of ROCK
- Dismantle inequities within our policies, systems, programs & services by exploring potential underlying, unquestioned assumptions that interfere with inclusiveness
- Advocate for and support strategic thinking about how systemic inequities impact our services and programs, and how best to address that in a way that is consistent with our mission
- Commit time and resources to expand our knowledge and understanding of equity, diversity and inclusion

ROCK is committed to employment equity, welcomes diversity, and encourages

applications from all qualified individuals.

Applicants who have specific questions about accessibility and/or accommodations are encouraged to contact the Residency Director early in the application process so that their needs may be fully addressed.

APPLICATION PROCESS

The residency application consists of 2 parts:

1. Online submission of the APPIC Application for Psychology Internship (AAPI). **Please note: ROCK is an APPIC member and our site participates in the APPIC Match (Match #185211).**
2. Online submission of support materials including:
 - A current curriculum vitae that specifically includes: a.) ages of children seen for each of assessment and intervention; b.) kinds of presenting problems of clients for whom you have provided assessment and intervention; and c.) theoretical orientations to which you have had exposure
 - Official graduate transcript(s)
 - Letters of reference from three professionals, two of whom can attest to your applied psychology experiences. References must use the APPIC Standardized Reference Form. Applicants should be aware that the Residency Program may directly contact referees who provide letters to obtain further information
 - The APPIC Academic Program's verification of Residency Eligibility and Readiness Form completed by the Clinical Training Director
 - Cover letter stating the applicant's professional plans and special interest in the ROCK Clinical Psychology Residency Program's specific training opportunities

Questions regarding the application process can be forwarded to:

Dr. Terry Diamond
Residency Director
Reach Out Centre for Kids
471 Pearl St. Burlington, ON
L7R 4M4
Phone: (905) 634-2347 ext. 1232
Fax: (905) 681-7477
Email: psychresidency@rockonline.ca or to terryd@rockonline.ca

The application deadline is November 1st each year. It is the applicant's responsibility to ensure that all required materials are received by this date. Applicants will be notified in December if they will be offered an interview. On-site, Video or Telephone interviews are typically arranged in January (*All interviews will be completed using video platform or phone). We do not require that applicants attend an on-site interview.

Applicants will meet at least two members of the training staff, have an in-person or virtual tour of the facility, and have a conversation with one of the current Residents. These conversations are strictly confidential.

In accordance with federal privacy legislation (Personal Information Protection and Electronics Documentation Act – <http://laws.justice.gc.ca/en/P-8.6/>) we are committed to only collecting information that is required to process the residency application. This information is secured by the Residency Director and is shared only with those individuals involved in the evaluation of the residency application. If you are not matched with our program, your personal information is destroyed within four months of the Match Day. If you are matched with our residency program, your application and CV will be available only to those involved in your supervision and training including your Rotation Supervisors, Primary Supervisor, Residency Director, and relevant administrative support and human resources staff.

Please note that this residency site agrees to abide by the APPIC policy that no person at this training facility will solicit, accept or use any ranking-related information from any resident applicant.

PROGRAMS AND SERVICES AT ROCK

Psychology Interdisciplinary Consultation

Psychology staff provide consultation to staff from other disciplines for the purposes of interpreting assessment results, providing information about a specific diagnosis or presenting concern, guiding treatment direction, and/or determining whether direct psychological services would be appropriate/beneficial.

Psychology Client Consultation

Psychology Staff meet with clients directly for the purpose of interpreting assessment results, providing information about a specific diagnosis or presenting concern, providing intervention recommendations, and/or determining whether further psychological assessment services would be appropriate/beneficial.

Psychological Assessment

Psychological assessments are considered for children and adolescents when there is a concern about development, learning, cognitive and/or social-emotional functioning. The assessment process may consist of interviews with parents and other professionals, observations of the child, individual testing, and feedback to parent(s), school/daycare, and other professionals.

FASD Consultation and Support

FASD Consultants provide consultation, coaching, education, training and service coordination to families, caregivers & professionals who are supporting individuals (up to age 21) with suspected or diagnosed FASD.

FASD Multi-Disciplinary Assessment

FASD assessment services are also available for children and youth age 2 to 25. The Assessment Team provides multi-disciplinary assessments, recommendations, and assistance with referrals to appropriate community programs. Assessment services are offered in partnership with the Halton FASD Collaborative.

Walk-In-Counseling Clinic

The Walk-In-Therapy Clinic provides quick access to therapeutic intervention as it enables family members to see a therapist with no appointment required. The intake process for further services may be initiated at the Walk-in session if warranted.

Brief Therapy

Therapists and families/individuals work together for 3-4 sessions to understand problems, explore their knowledge and abilities, and together develop solutions leading to an overall improvement in their relationships, their sense of themselves, and their ability to manage problems and difficulties now and in the future. Brief therapy may also be used to further assess the need for more intensive services and supports.

Family Therapy

Family therapy helps families, or individuals within a family, understand and improve the way family members interact with each other. Family therapy examines the family as a system and emphasizes family relationships as an important factor in the psychological health of each family member and the family system as a whole. Problems are seen as arising from systemic interactions within the family rather than placed on a single individual.

Individual Therapy

In individual therapy, the therapist works with the child or youth to explore problems and solutions. Caregivers may be involved in the treatment process to varying degrees depending on the age and developmental stage of the child/youth, the presenting concerns, and/or the youth's desire to include the caregiver. Various models are utilized depending on the presenting problem and best fit for the client (e.g., cognitive-behavioural, narrative, psychodynamic, brief, solution-focused, and strength-focused therapies).

Trauma Treatment Program

This service is for children who have experienced a traumatic event such as abuse, separation from their caregiver, illness, abandonment, family break-up, inconsistent access visits, violence, loss, the death of a friend or family member, or any event that has had an impact on the child. Experiencing trauma can affect the child's emotions, behaviour, and consequently their relationships within the family.

Crisis Response Program

This program provides immediate outreach for children and youth, their caregivers, and community members. The Crisis Response telephone number connects individuals to our 24-hour answering service, which then connects individuals in crisis with a crisis counsellor.

Intensive Child and Family Service

ROCK's Intensive Counselling Service (ICS) program provides a range of intervention and support services to high-need children/ youth (aged 6-18) and their families. Families will typically receive two to four in-home sessions per week with a member of the ICS team, for three to six months. Families are expected to participate in setting goals, strategies and treatment for themselves and their child. However, the ICS team will work with the family to actively problem-solve around barriers to treatment or engagement. Primary program therapeutic interventions include but not limited to: Emotion Focused Family Therapy (EFFT) and Dialectical Behavior Therapy (DBT).

Residential Services

Aberdeen is a 6-bed residential treatment facility for youth between 12 and 15 years of age. This intensive family-based treatment program is for children/youth struggling with significant mental health challenges.

Early Years Therapy

This therapeutic service aims to develop and enhance the parent-child relationship, as primary

caregivers play the most significant role in supporting development. Within this relationship, a child learns to feel secure, use language, regulate emotions and interact socially. Common indicators for referral to this program include problems with sleeping, eating, separation, attachment, jealousy, or anger beyond the child's developmental stage. Videotaped play sessions help parents read children's cues and respond sensitively, understand the child's behaviour as communication, and strengthen the relationship.

CLINICAL GROUPS

NOTE: Please note that the subset of groups that are offered may vary considerably in any given year.

Circle of Security Therapy Group

Circle of Security is a relationship-based parenting program that empowers caregivers by helping them understand the specific messages their children are communicating and provides a road map to respond in ways that will enhance the security of the attachment relationship with their child. Through the use of video and reflective dialogue parents are introduced to the Circle of Security model, allowing them to explore their child's behaviors and the parent-child relationship in a new way that opens up avenues for reflection and change.

Intro to Cognitive Behavior Therapy (CBT) Group

This five-session group provides an introduction to Cognitive Behavioural Therapy (CBT) skills for youth between the ages of 12-16. Youth learn basic CBT skills.

ADHD Caregiver Group: Parenting Your Child with ADHD

This is a 4-part series designed to help caregivers understand ADHD and the impact ADHD has on children under 12 in their home, school and community environments. Caregivers learn about the different types of ADHD, what it means for their child and their family. Caregivers also learn how to understand ADHD symptoms vs. behaviour problems. The focus is on helping caregivers to understand this complex disorder and how they can support their child.

Children's Anxiety Groups

Children and adolescents learn to identify, measure, and cope with anxiety and learn social skills, while parents learn about anxiety and how to parent anxious children. Separate groups are offered depending on the age of the children (e.g., group for school age, teens).

DBT Skills Group

DBT is an intervention for youth with multiple problems, particularly those who present with suicidality or self-harm. The goal of DBT is to help youth identify thoughts, beliefs, and assumptions that make life harder and help them to learn different ways of thinking that will make life more bearable. DBT uses a cognitive-behavioural approach that emphasizes psychosocial aspects of treatment. DBT has two main components: Individual weekly therapy sessions that focus on problem-solving behavior and reinforces adaptive behaviors and skills

learned in group. In weekly 2-hour skills group sessions, five different modules are taught to youth and parents/caregivers to target specific behaviors and teach healthy skill sets to address problematic behaviors. The duration of the DBT program is 22 weeks long.

PREVENTION SERVICES and PARTNERSHIP PROGRAMS

Positive Space Network

The Positive Space Network builds community and creates safer spaces for 2SLGBTQ+ youth ages 6-24 in Halton Region by creating youth-focused programming and by providing mental health support.

Our Community Cares

This program works within the community to empower people and to help build skills in adults and children who are at risk for mental health problems.

Caroline Families First

This program is a collaboration between the Caroline Family Health Team in Burlington, local pediatricians, Parents for Children's Mental Health and ROCK. Developed as a new model of care in response to our fragmented mental health system, this program is designed to improve how services work together for children and youth with significant mental health challenges and their families.

EarlyON Child and Family Centre

ROCK EarlyON provides a welcoming and inclusive space for all children ages birth to six years and their families to participate in programs on-site, virtually, and outdoors. These free high-quality programs encourage children's social, emotional and developmental milestones and opportunities for growth. Parenting services also provide parenting supports that will guide a fulsome understanding of infant and child's developmental and mental health needs.

Halton Families for Families

The goal of Halton Families for Families is to connect, support and engage with Halton families who are impacted by a child/youth's mental health struggles. The initiative is uniquely led by families, which ensures their voices are valued, heard and woven into the fabric of all activities and events, to improve the quality of life for families. We offer a wide range of workshops, wellness sessions and socials for caregivers and families impacted by their child's mental health.

Halton Coordinated Service Planning (CSP)

CSP is intended for families of children and youth with multiple and/or complex needs who may be experiencing challenges in areas such as navigating the system, coordinating multiple

services, coping with or adapting to their child's needs, concerned about the health and well-being of other family members, and/or have limited social/community supports.

Halton FASD Collaborative

A collaboration of organizations in Halton that provides FASD Assessment and Diagnostic Services, as well as FASD Consultation and Education for caregivers and professionals. Support programs such as Camp Unity and Reach For It are also provided.

Danielle's Place

Danielle's Place offers a range of groups for female-identifying and non-binary youth ages 8-16. These groups support individuals who have been identified as being at risk of an eating disorder diagnosis and may be struggling with low self-esteem, body image concerns, dieting behaviors, over-exercise, negative self-talk, etc.

Autism Services

Autism and Behavioural Services is a fee-for-service program that provides service for children with autism between the ages of 0-21. Programming is based on the principles of Applied Behaviour Analysis (ABA) and focuses on teaches the skills to lead productive, independent lives.
